

SHOP FLOOR MANAGEMENT

Total control of the production line.

Follow all stages of your operations more quickly, with reliable information and in real time.

| The inCentea Wide's Shop Floor Management solution was designed to assist organizations in optimizing their production processes.

This solution integrated with your company's ERP collects information on your manufacturing processes in real time, through collection points (usually touchscreen terminals), placed at different points of production, improving the management, organization and profitability processes of your company resources.

Automates your production line making it:

More agile

With centralized information

With reduced operating costs

Prepared for your sector

- ✓ Metalworking Industry
- ✓ Plastics Industry
- ✓ Food industry

- ✓ Industrial equipment
- ✓ Medical equipment
- ✓ Metallurgy

- ✓ Pharmaceutical products
- ✓ Chemical products
- ✓ Cosmetics

Shop Floor Management Benefits

The inCentea Wide's Shop Floor solution allows you to monitor tasks performed on the production line, generate performance indicators, connect to machines, receive data, identify failures and centralize all information in the production area, to support decision making and optimization processes with other areas of your business.
